E-Resources**Definition****1. According to Wikipedia**

“Electronic resources means information which can be stored in the form of electrical signals, usually on a computer, information available on the internet.

Types of E-Resources

The resources are very important source of information searched and retrieved and disseminated through ICT. It includes Journal articles, newspaper articles, book reviews, and conference proceedings etc.

1. **E-Books** : E-books are important source of information available in digital form. It comprises text and images in digital form and can be read with reader or e-book device. Users can also read a e-books on PC's and smart phones also.
2. **E-Journals** : E-Journals broadly refer to any journals, Magazines, newsletter, or any type of serial publication in digital form available over the internet. E-Journal containing research paper, review articles scholarly communication.
3. **Aggregator** : Aggregator is the collection of electronic publications, or firm database searchable through electronic mechanism. It provides access to a large number of journals from a range of different publishers.
4. **Consortia** : Consortia is the sharing the information resources with different institutions for mutual benefit. It is very important in achieving the cost effectiveness against the shrinking budget. UGC-inflibnet, e-journals consortia, CSIR consortia, INDEST (Indian National Digital Library in Science and Technology) consortia, IIM Library consortia, are some of the consortia serving the various kinds of institutions.
5. **E-Reference Sources** : There are various publishers and vendors provide various reference sources in electronic form through their databases and websites such as online dictionaries, encyclopedia, yearbooks, online directories, etc. Wikipedia is new form of online information source. In Wikipedia the users can contribute the new information and they can alter the available information.
6. **E-Thesis and Dissertations** : In academic libraries e-thesis and dissertation service is most important as far as research is concern. It is very useful for avoiding the duplication of research work and for selection of research field to the research scholars.

proper user with time efficiency. ICT is the great invention for the libraries and e-resources are the result of ICT. In this age of information technology research plays very important role in the development of society as well for the country where e-resources are at the center of this activity.
