

## Report of Google Meet Programme

Introduction : it was given by Principal Dr. Subhash A. Sawant Report :- Due to Covid 19 pandemic teaching- learning process would be improved. So, Principal has decided to take such workshop for our Teaching Staff. According to this on dated 15/07/2020 such webinar ( ONLINE Mode) using Zoom online platform. In this webinar what are different Tools available for the ONLINE Teaching are discussed and out of these Google Meet for the Teaching and Google Classroom for the Assignment are decided. In this regard our faculty members Dr. Kulkarni M.K. and Dr. Bhaisare S.S. given Hands on training on the above two Tools for the remaining faculty members. They also gave assurance to these members that when you got any difficulties while using these tools we are always ready for resolve to them. Such Training was complete in 3-4 Hours. In this workshop all the Teaching Faculty member are present i.e. 22. Vote of thanks : Shri Bulakhe S.C Loknete Gopinathji Munde Arts, Commerce & Science College, Mandgad has organized Training Programme on Effective use of Google Tools in Teaching Learning Process on 04.09.2021 at 3.00 pm by Shri. Bulakhe S.C. will be the Resource person. In his Speech he give information about

### 1. Google Scholar

Google Scholar uses its famous search engine function to scour the web for reliable, academic sources. It is of great benefit to students because they no longer have to spend hours in a physical library or searching through the records of their school's online library.

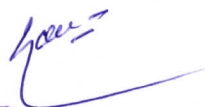

Using the advanced technology behind Google's namesake search engine, Scholar can find relevant information to all topics verified to be from sources acceptable in an academic setting. Whether a student searches "What is the average high school counselor salary?" or "What are the implications of machine learning on the Internet of Things?", Google Scholar has a truly massive pool of resources that are nearly guaranteed to produce valid results.

Then, students can conveniently save their sources in organized folders for revisiting later.

This tool also helps teachers and professors because it has a citation function. This saves them time on correcting the format of citations and allows students to focus on the information at hand.

### 2. Google Slides

Google Slides is Google's answer to Microsoft PowerPoint. With its help, students' presentations are easily stored in the cloud and accessed anywhere, and links to view can even be shared with their teachers.

It has an intuitive interface as well as an auto-save function that keeps forgetful students from losing their work should the power go out, their computer crashes, or meet other technical issues.

There are also many free templates available online and easily imported into Google Slides to help make their presentations beautiful and engaging. That serves to benefit both the student and educators alike by keeping them more interested through carefully organized content. It's one of the best free tools available on the web.

### 3. Google Drive

Google Drive is a storage service that provides space to store files for free up to a certain number of gigabytes and is included with each new Google account. Some of the benefits of Google Drive on education is the cloud nature of the service which allows students to access their documents from anywhere, even from their phones.

It also sports an autosave feature to keep them from losing valuable progress, as well as a share feature that can allow them to provide access to their teachers to edit, comment, or view. In addition, it's an excellent tool for team projects, as it permits collaborative access and real-time updates.

Google Drive includes their own version of many of Microsoft Office's most common file types such as .doc and .xlsx and can export to each of these.

### 4. Google Classroom

Google Classroom is among the suite of Google tools but is specifically designed for educators and students in mind.

With it, teachers can communicate with students, provide feedback on their work, create lesson plans, and distribute assignments to their students all from a single, intuitive dashboard. By making the necessary tasks of a class seamless and easy, teachers and students can focus on the most important part of any classroom experience—learning.

### 5. Google Earth

Especially true for Earth Science and Geography teachers, Google Earth is a tool that helps students visualize our planet. Because it is interactive, the possibilities are practically limitless. Teachers can show the geography of the globe to students in an entertaining setting, explain the relationship between areas when discussing historical events, and, on a collegiate level, discuss politics and various concepts with this learning aid.

### 6. Google Expeditions

Although funding is lacking for many schools, field trips are proven educational tools for generating success, so much so that it increases grades, graduation rates from high school and college, and even a 12 percent increase in annual income for students, according to the NEA.

Helping to bridge the gap between funding needs and the benefits of field trips is Google Expeditions. It provides teachers with trip "kits" that let their students experience a nearly-endless supply of adventures in virtual reality. Not only can students see places all over the world that budgets or biology (such as would be the case with underwater tours) would have prevented by using virtual reality viewers, but each field trip is filled with information that assists in both teaching and learning.

## 7. Google Meet

Google Meet is a video conferencing app. It is the business-oriented version of Google's Hangouts platform and is suitable for businesses of all sizes. The solution enables users to make video calls with up to 30 users per high-definition video meeting. The app allows users to join pre-scheduled meetings from calendar events, choose a link, enter meeting code and even dial in from their phones if the invitation includes a phone number. Google Meet integrates with G Suite versions of Google Calendar and Gmail and shows the complete list of participants and scheduled meetings. It shows a "join" button for users to connect to the meeting and provides options to mute and turn off the video during the meeting.

All the staff member present for the training.
