Report of Programme- Poster Making on *Gender Equity*

The significance of gender equality has gained attention in recent years. More people are talking about it and hence, a number of positive changes are happening in our society. Schools are a place where students can be educated about the importance of gender equality. They will grow up to be informed and responsible adults as they are exposed to gender equality in their early years of life. You can try to adopt practices that reduce the gap between genders by challenging pre-existing discriminatory notions. Schools should be a safe space for pupils to learn without experiencing gender prejudice. The Department of Lifelong Learning and Extension of our college organized a Poster Making programme on Gender *Equity* on 29/09/2021. More than 60 students take part in this competition. Students had prepared posters on different topics pertaining to Gender Equity. The rapid growth in female child's dissimilar sex ratio fosters a culture free from discrimination, and teachers can ensure that all students participate in extracurricular activities. Additionally, it can eliminate any gender stereotypes that pupils and their parents may have. You can educate them that gender plays no part in activities like sports and that they are for everyone. It can dispel any preconceived notions and promote a healthy learning atmosphere. In this manner, regardless of gender, students are given the chance to explore a range of different fields.

The outcome of an Activity

Equity leads to equality. Gender equality requires equal enjoyment by women and men of socially-valued goods, opportunities, resources, and rewards. Where gender inequality exists, it is generally women who are excluded or disadvantaged in relation to decision-making and access to economic and social resources. Gender equity reduces crime and violence against women and makes communities safer on all levels. It also promoted a sense of equality in the mind of students.
