

Policy Document on Water Conservation

Preamble:

Water scarcity is one growing concern of the present times, the ultimate solution for which is water conservation. Issues related to water governance have not been addressed adequately. Mismanagement of water resources has led to a critical situation in many parts of the country. In this context, our institute is committed to rainwater harvesting and sustainable water management. We have taken several initiatives to conserve water such as rainwater harvesting from rooftop run-offs, the creation of a pond/trenches and bore well recharge system, maintenance of the water distribution system, etc. Therefore, the institute makes a policy for water conservation and sustainable maintenance of resources.

Applies to:

Faculty, staff, students, and visitors.

Objectives:

1. To increase the recharge of groundwater by capturing and storing rainwater, by rainwater harvesting from rooftops and run-offs.
2. Store the water for gardening & washing purpose.
3. Low-pressure & sensor-based water tabs in some areas of campus.
4. To recharge the bore well system in the monsoon season.
5. To reduce the wastage of water.
6. Soak pits to treat effluents from laboratories.
7. Cleanliness drives to prevent water runoffs and clogging of waste material into nearby water sources.
